

Icthyosaur

by Dan Dickinson
for any ensemble

White noise. Vertical = Volume.

Popcorn: Very short, little sounds.
Start sparse and get denser.

Pitch focus: Everyone attempts
to hone in on the same pitch.
Slowly, and collectively, the pitch
moves around.

Sync Thumps: Everybody
makes a loud sound
at the same time. There are
3 of them. Leave plenty of
space in between.

Big Popcorn: Short but
big sounds. Very quickly
increase density.

White noise,
decrease in volume.
